

CLAIMS

What is claimed is:

1. A jewelry piece having exchangeable ornament settings, comprising:
a base;

5 one or more base through holes;
one or more shanks having shank through holes;
an exchangeable ornament setting;

a receiving hole associated with the base for receiving the
exchangeable ornament setting; and

10 at least one recessed hinge pin inserted into the base through holes
and the shank through holes in order to couple the base to the one or more
shanks and secure the exchangeable ornament setting into the receiving
hole when the one or more shanks are rotated perpendicularly to the base.
